PS 150 Demo

As the school year came to an end, StuyPulse was busy preparing for the demos that took place in June. On June 20th, our team hosted a ROMI demo at PS 150. During this event, we were able to interact with the participants and present the capabilities of the tiny ROMIs to 3 grades as well as encourage them to pursue STEM and FIRST robotics. We had so much fun and hope to come back for more!

Christa McAuliffe Demo

On June 24th, our team had the opportunity to demonstrate our 2024 robot Izzi at IS 187 Christa McAuliffe in Brooklyn. We gave rising high schoolers a presentation about our team and FIRST. Our team was thrilled to show them more about FRC and the inner workings of the team! We hope to see them join our team this new school year!

Duel on the Delaware

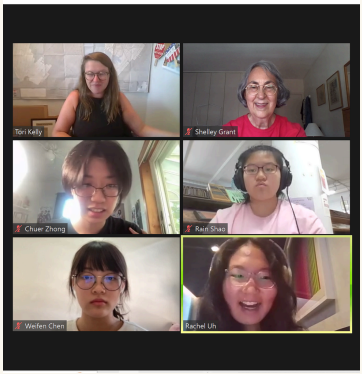

On June 22nd, our team traveled to Salem Community College in Carneys Point, New Jersey to compete in an off season event, Duel on the Delaware! There, our team became the captain of the 8th alliance, partnering with teams 369 and 9998. Our Impact Team also had a chance to practice their presentation for the judges. We are proud to walk home as event finalists and will continue to work hard to keep up this momentum!

FLL Mentoring

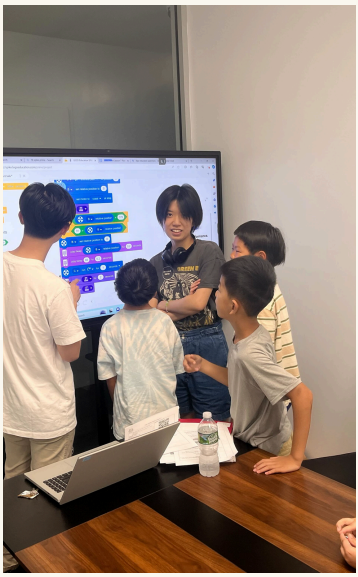

Over the summer, our members began a First Lego League initiative at MoMath, a Bensonhurst community center, and a Chinatown community center. In the classes that we created, we taught participants about engineering and programming. The children were excited to learn Scratch and develop problem-solving skills. We are very proud of their growth and achievements.

Business Department

During the summer, members of the business department met frequently online to work on the Intuitive Foundation grant and testimony for a New York state budget hearing where we advocate for afterschool STEM programs in public schools. We also met in person to plan business projects such as fundraisers and newbie education!

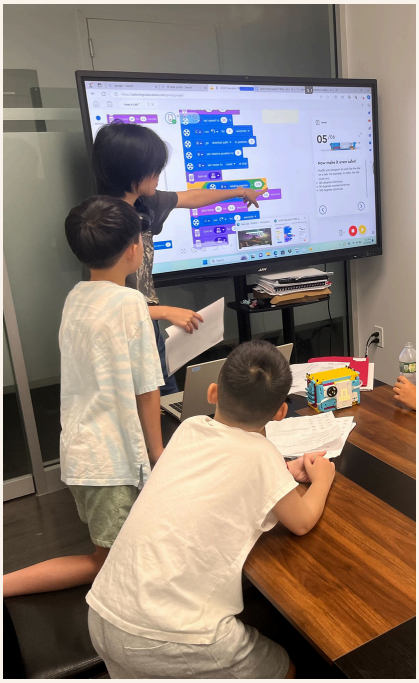

Impact Team

Our Impact Team has been very busy over the summer working on the first draft of the executive summary. We came up with a tentative theme and discussed different types of outreach we want to highlight in the essay. We wish our Impact Team the best of luck in the upcoming season!
