STUYPOST

December 2021 Newsletter

Upcoming Events

There will be a Kick Off Event on January 8th due to the beginning season starting in January. It will be a meeting for the entire team to essentially strategize and go over rules of the game. The team will also watch the game animations to get a start on planning.

Stuy Splash

On December 4, 2021, we hosted Stuy Splash at Stuyvesant High School. We had many presenters from StuyPulse 694 and other FRC teams cover topics to introduce Robotics to both newbies and curious students. We recorded presentations, which can be found at this YouTube link.

Software Engineering

As we approach the beginning of the season, we've started wrapping up our Newbie Ed programs. Software Engineering newbies have continued learning more about object-oriented programming (OOP) in Java.

Marketing

The Marketing department worked on scheduling Stuy Splash, writing thank you letters to recent sponsors, and this newsletter. Over this month, they also sorted through most of the forms required from new members.

Engineering

Engineering newbies had the chance to show off the prototypes they've worked on over the past few weeks. Engineering has also started CAD education to teach anyone interested in learning CAD design.
