November 2021 Newsletter

Mustang Robot Rodeo

Congratulations to our team for their win at the Mustang Robot Rodeo competition at Clifton High School, New Jersey! We dominated our competitors and won first place. This was our second off-season event of the year and we allied with Team 3314, the Mechanical Mustangs and Team 8714, the Mater Dei Prep Robotics team.

Stuy Splash

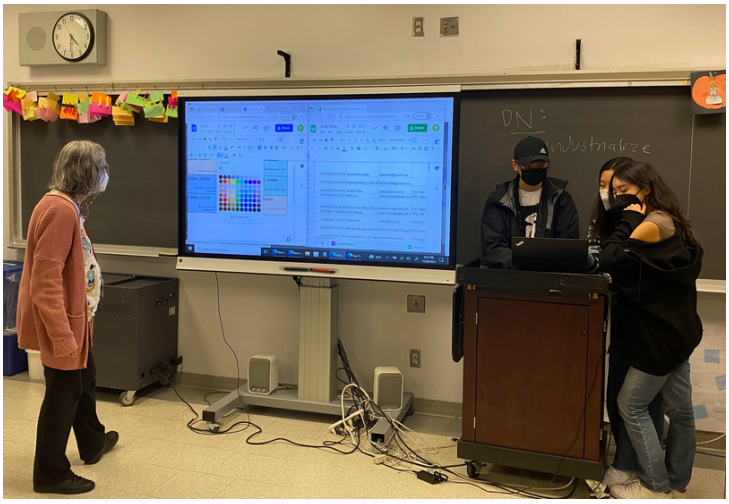

One of our upcoming events is StuySplash, an annual event we hold to introduce interested students to FIRST Robotics. It will be held on December 4th, 2021 from 1PM to 5PM at Stuyvesant High School. For those interested in signing up to be a presenter, please fill out this link by Sunday, November 28th, 11:59 PM EST. To sign up to attend the event, please fill out this Eventbrite link!

Software Engineering

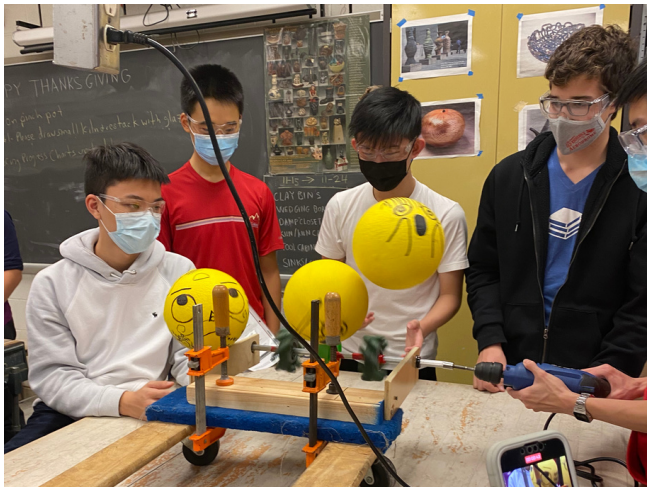

Software Engineering newbies continued to learn Java Basics, including loops, operators, and if/then statements.

Marketing

Marketing newbies were introduced to Canva, learning how to utilize it to make Instagram posts, posters, and more. They also helped with outreach to schools regarding StuySplash and helping to organize forms and dues.

Engineering

Engineering newbies have started to build prototypes for the Infinite Recharge challenge through using tools and gaining hands-on experience. They have also transitioned to the lab setting, learning how to follow lab safety protocols and familiarizing themselves with proper tool care.
