Chezy Champs

From September 27th through the 29th, StuyPulse competed at our first off season competition of the school year, Chezy Champs in San Jose, CA. Only select teams are invited to this prestigious robotics competition. StuyPulse is honored to have had this opportunity to compete and meet so many wonderful teams to learn from!

Robo Replay

On October 19th and 20th, our team participated in Robo Replay, an off-season competition in Brooklyn, NY. During qualifications, we placed first seed with our offseason robot, Power of Friendship and achieved the high score of 129 points. We also made semifinals with our 2024 robot Izzi. We were captain of Alliance 1 and competed alongside Team 1796, RoboTigers and Team 8739, Redhawk Robotics. We are extremely proud of our team for their hard work and hope to keep this up.

Brunswick Eruption

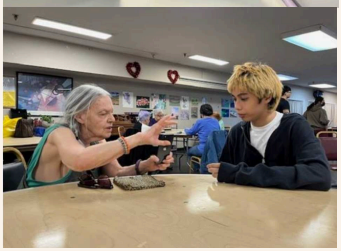

On October 26th, our team competed in Brunswick Eruption. We placed second seed with our off-season robot, Power of Friendship (PoF). As captain of Alliance 2, we competed alongside Team 1796, RoboTigers and Team 369, HighVoltage Robotics. With them, we secured our second consecutive win after Robo Replay! PoF performed impressively throughout the entire event, winning every match we played in. We are overjoyed with how this offseason went and are anticipating the 2025 FRC game.

Senior Center

Every other Thursday, members of our team volunteer at a local senior center to help our neighbors with any problems they have regarding technology. Volunteers always enjoy interacting with them and listening to their stories, and we are happy to help out!

Coney Island Maker Faire

On October 5th and 6th, StuyPulse participated in the Coney Island Maker Faire. We demonstrated our 2024 robot, Izzi, and our 2022 robot, Excelsior. At the event, we talked to visitors and shared information about our team, STEM, and robotics. We look forward to participating in the next Maker Faire!

Alumni Reunion Demo

While our team competed at Brunswick, some members attended the Stuyvesant Alumni Reunion where they presented our 2022 robot, Excelsior. At the event, they shared their experiences with robotics and informed alumni about our impact within and beyond our community. We enjoyed giving tours of our lab and meeting alumni from Stuyvesant and our team!

FLL Mentoring

In October, StuyPulse resumed our both Girls Scouts and Bensonhurst FLL mentoring program! The kids have been hard at work and are as ambitious as ever. We are excited to continue working with them and watch them grow!

Open House

From October 16th to 17th, our school was open to middle schoolers and their families across New York City. When visitors came to our lab, we presented with our FTC sister teams and informed them about what we do and why they should be interested in robotics. We were glad to meet them and hope to see them next year.

Interest Meeting

When the school year started, StuyPulse held two interest meetings open to all Stuyvesant students. We introduced ourselves, along with our FTC sister teams, and gave presentations about FIRST and our three departments.

Newbie Education

After our interest meetings, we began newbie education for all new members. Each department created projects to teach new members the skills they need to succeed on the team.
