December 2022 Newsletter

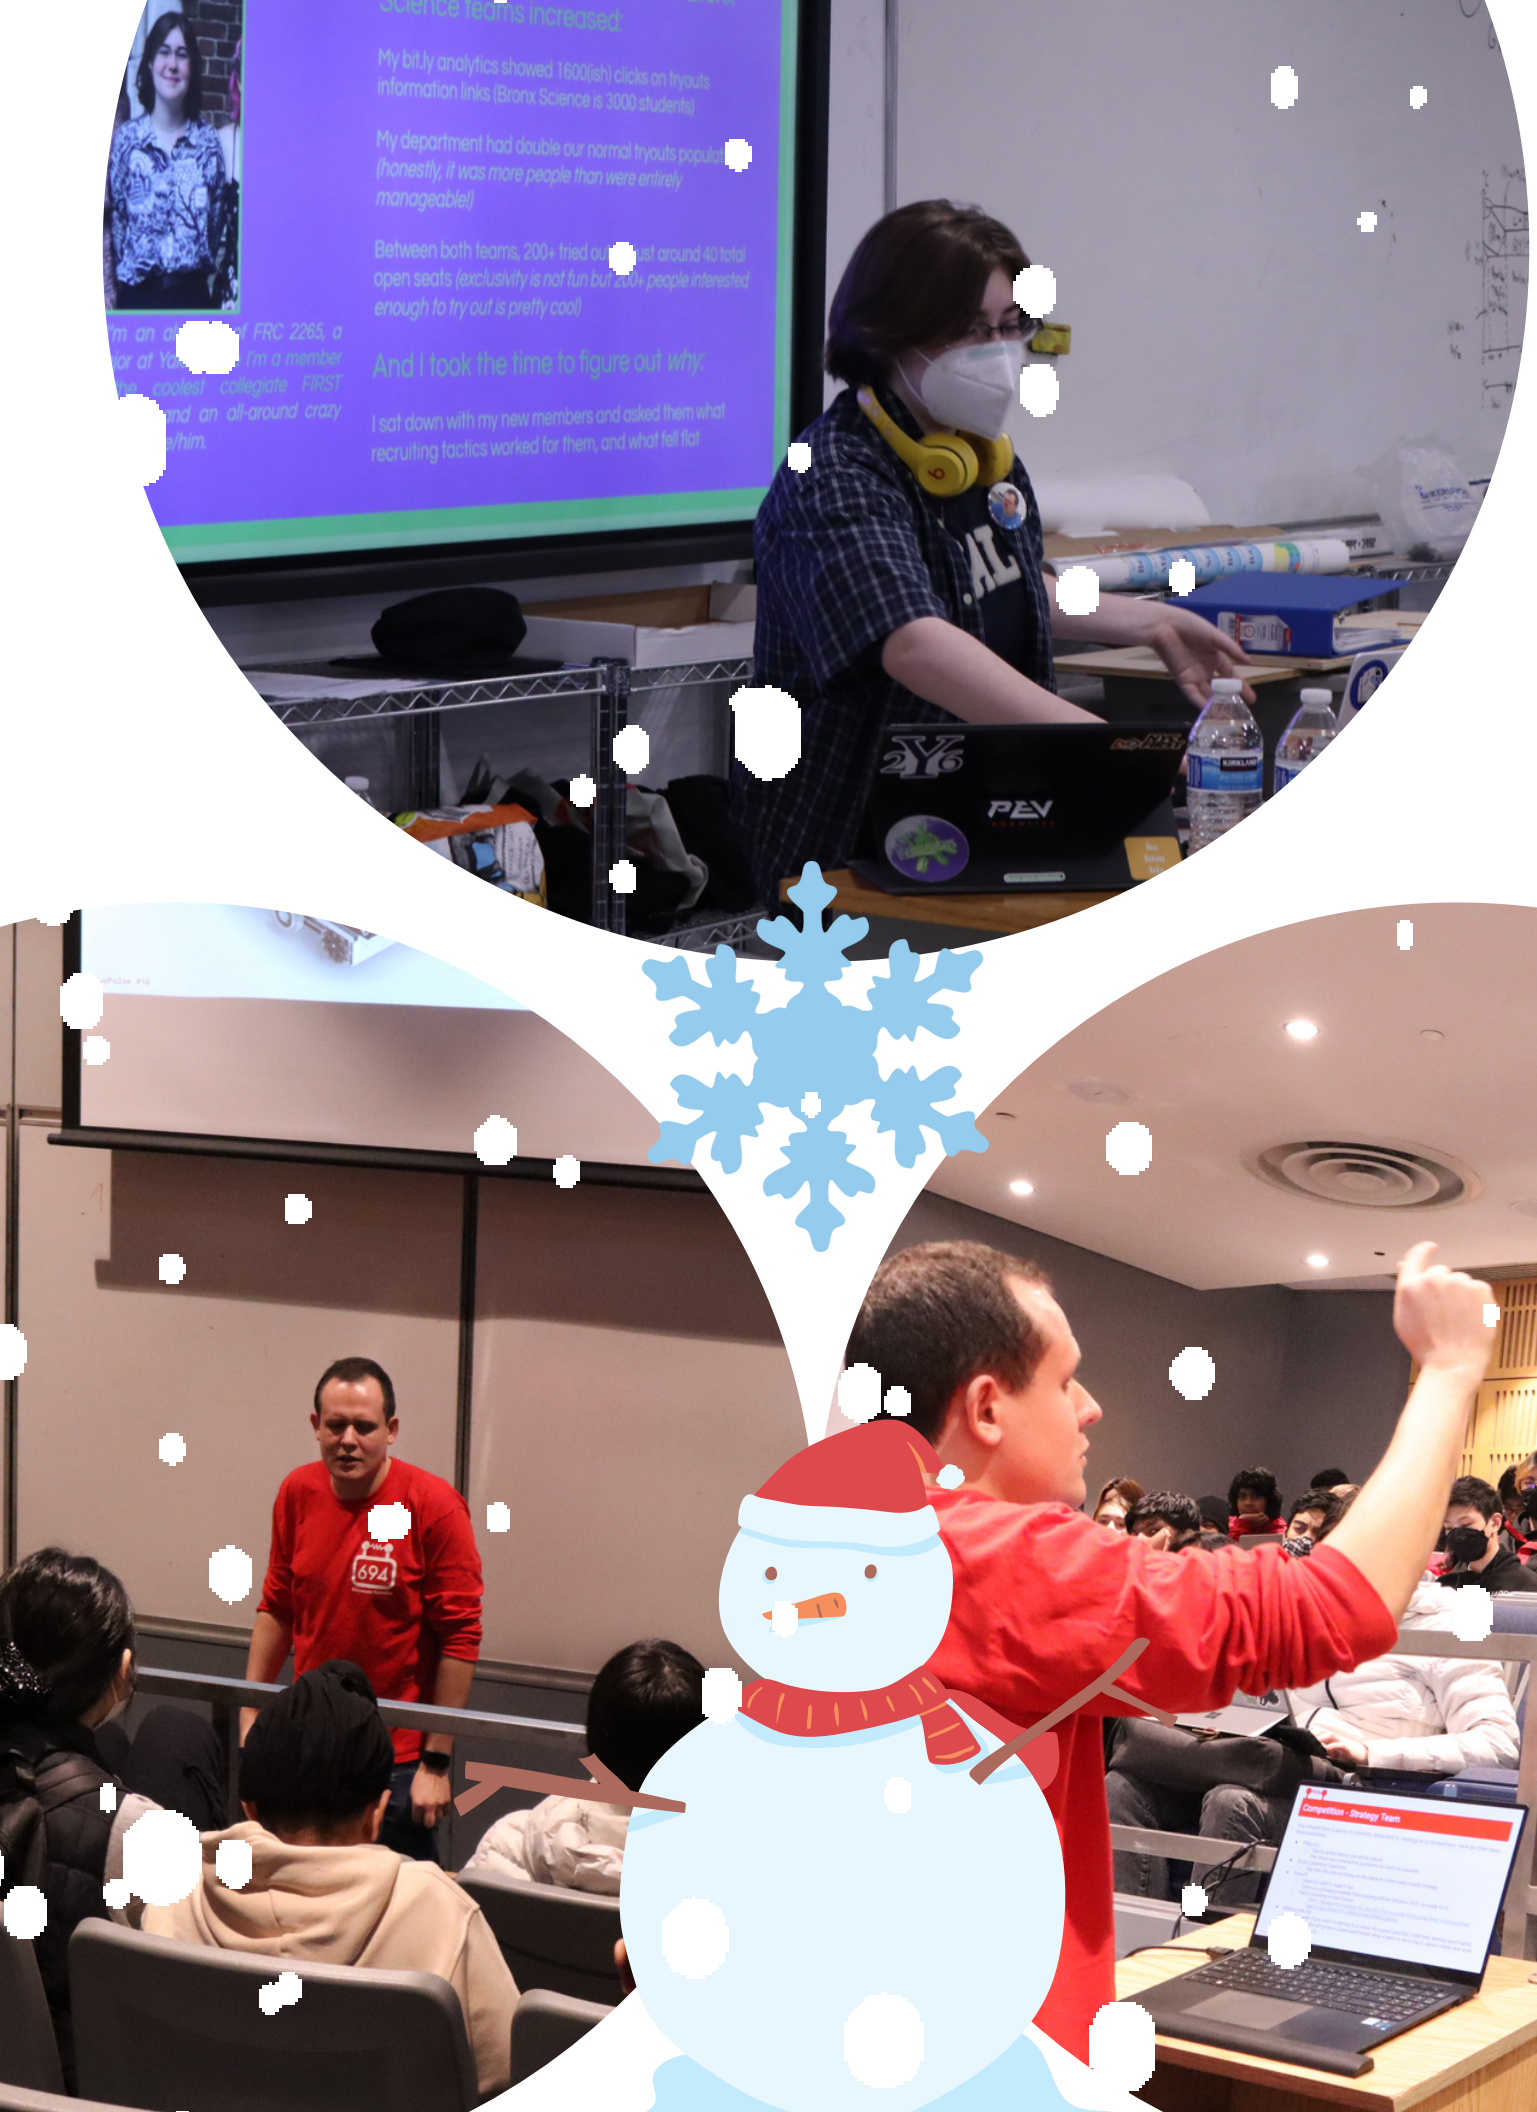

Stuy Splash!

Our annual lecture series was hosted this month, and it was an astounding success! *FIRST* teams from all over the country came to listen to our skilled presenters.

Presentations were hosted on 3D printing, finance managing, the Impact award, and more!

We also took the opportunity to sell some merch and food, raising over $700.

Science Teams increased:
My bit.ly analytics showed 1600(ish) clicks on tryouts information links (Bronx Science is 3000 students)
My department had double our normal tryouts popula
(honestly, it was more people than were entirely manageable!)
Between both teams, 200+ tried ou st around 40 total open seats (exclusivity is not fun bu 200+ people interested enough to try out is pretty cool)
And I took the time to figure out why:
I sat down with my new members and asked them what recruiting tactics worked for them, and what fell flat

Official Lab Opening

We held a ribbon-cutting ceremony with the Alumni Association for the brand- new Lin Brothers Robotics Lab, which was sponsored by Alfred and Edwin Lin. Councilmember Christopher Marte, Gale Brewer, and Senator Brian Kavana-gh all attended to see the newly renovated lab.

Stuy Students Teach Tech

For the past few weeks, members of our team have visited the senior center at Independence Plaza to help them with technology. We've helped them set up Zoom, taught them how to use it, and so on.

Happy holidays!
