Stuy Post

November 2022 Newsletter!

Brunswick Eruption

Our final offseason was at North Brunswick Township High School! We were able to finish as finalists with our alliance members: Team 369, High Voltage Robotics and Team 1796, the RoboTigers!

Turkey Trot

StuyPulse collaborated with Key Club during our Turkey Trot event at Rockefeller Park. The funds acquired were donated to STEM kids, an educational nonprofit that integrates STEM within many schools' curriculums.

Newbie Education

1. We introduced Business newbies to our various subdepartments, including outreach, media, and operations.

2. Software newbies were taught the basics of using odometry.

3. Engineering newbies were challenged to design an intake and learned CAD.

Attendizer

The IT department finally finished creating the attendizer! This will help us keep track of each member's participation and who is in charge of what. The program was created thanks to our team's IT members!

Upcoming Events

Official Lab Opening - Dec 8th

Stuy Splash - Dec 10th
