STUY POST

Summer 2023

Demo at MS 187

We held a demo at the Christa McAuliffe middle school. There we gave presentations about the team, and encouraged rising high schoolers to actively participate in their school's stem clubs. We demonstrated out robot excelsior, and had a Q&A portion to give advice.

NYC Math Festival

We also participated in the MoMath NYC Math Festival. This was held at Fosun Plaza on July 15th. We demoed alongside our FTC teams, 310 and 479!

This demo lasted over 7 hours and was our longest recent demo to date. We talked with parents about STEM opportunities for kids around the city and showcased our robot Excelsior!

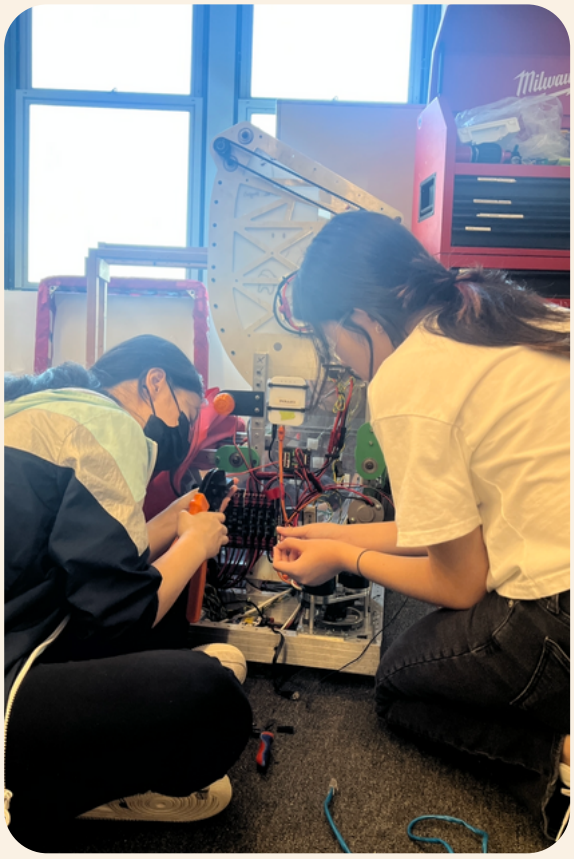

Extravaganza

To celebrate a great year, we had our annual extravaganza! This was held on July 9th in our school's cafeteria

We had a raffle, where we raffled off a variety of items from different parts of past robots to rare merchandise. We also gave senior gifts and mentor gifts to congratulate our team members for an incredible year!

Off Season

Through out the summer, our engineering and software engineer departments worked on our offseason bot

This robot will compete in the Charged Up game alongside our 2023 season robot, Jim

Upcoming Events
