December 2018 Newsletter

Stuy Splash

On December 8th our team hosted Stuy Splash. Stuy Splash is a series of lectures open to all FRC and FTC teams, veterans and rookies alike, throughout the Tri-state area. The lectures cover a range of topics from pneumatics to computer vision to finding sponsors; our goals being to teach teams more about FIRST and robotics.

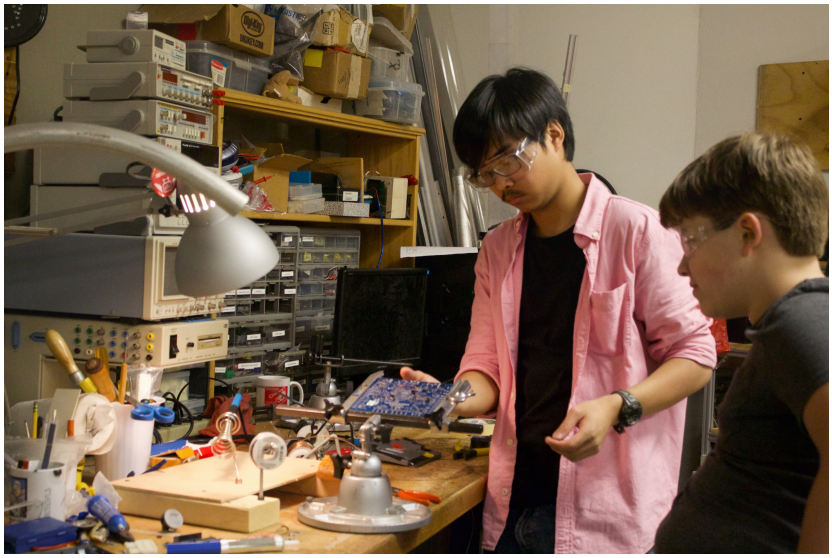

FLL Scrimmage

StuyPulse also hosted an FLL Scrimmage the week after Stuy Splash. During the scrimmage, FLL teams competed against one another to complete as many missions as they could within a certain time limit. Our members have also served as judges for their research projects.

Engineering

Our engineers split up into different groups and started working on prototypes that we might use for the 2019 season, Destination: DeepSpace. We have also started organizing and cleaning up the lab to prepare for the next season.

Marketing

With build season around the corner, our marketers began preparing and planning for the next couple of weeks. They have begun working on awards, such as the Chairman's Award, Woodie Flowers Award, and Entrepreneurship Award.

Software Engineering

Our Software Engineering department taught their newbies about different sensors that we use. They also worked on testing beta software on our old robots. Some software engineers have started working on a Laptop cart to carry and easily transport our laptops.
