October 2019

Newbie Interest Meeting

Our team hosted its annual interesting meeting, attracting more than 100 interested students. The students learned about each department of the team and watched a demonstration of last year's robot, Alfred.

Open House

Stuyvesant had its annual open house for interested middle school students and parents to tour the school. StuyPulse had members of each department talk with tour groups to inform and answer questions about the team. The team also demoed DEStiny, our robot from 2016.

Newbie Education

Each of our departments started their newbie education. In software engineering, newbies were introduced to the basics of Java and its use in robotics programming. In engineering, newbies were tasked with creating prototypes of different mechanisms and robots. After designing multiple prototypes, engineering newbies finally tested them out. In marketing, newbies learned about sponsorship, awards and applications of the team.

Bake Sale

Our team hosted its first annual bake sale. Members spent their free periods volunteering to sell baked goods to students and staff. We'd like to thank all the parents who volunteered!

Bloomberg Volunteering

Throughout the month, our team volunteered for Bloomberg events. In the spirit of Halloween, we placed pumpkins throughout Governor's Island and gave out candy to trick or treaters who visited the island.

Duel on the Delaware

This past month our team competed in the 2019 Duel on the Delaware. StuyPulse was the Captain of Alliance 2 during this off-season event, and made it all the way to Finals. Along with our alliance partners Team 271 and Team 3314, we ended up as Regional Finalists.
